

# THE MONDRIAN

## EXPERIENCE

Category: Family game Age: +8 years Players :2-5 Duration: 5-10 minutes Components: 46 cards

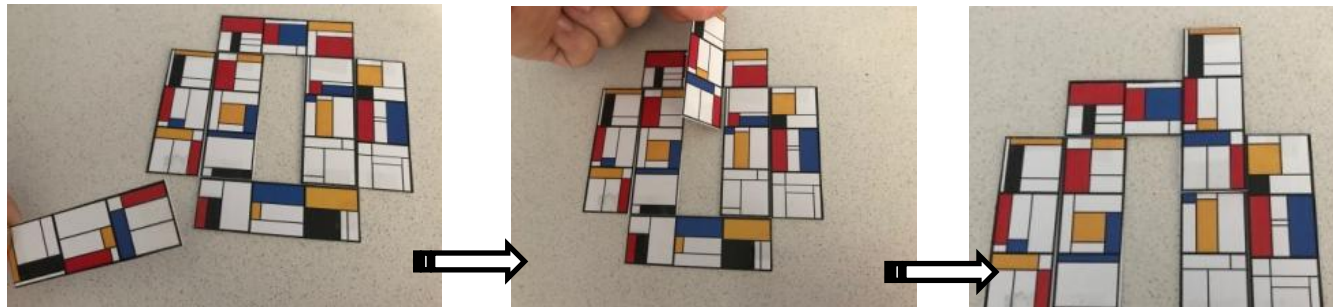

Author: Félix Bernat Julián

### ***Make a Mondrian style painting and compete with your friends!!!!***

*The Mondrian Experience is a card game where players compete simultaneously to place all their cards before their opponents and complete a Mondrian-style painting.*

## The Game

The players have to place all the cards of their hands in the painting. The way to do it , is overlapping two squares that are already in the painting, keeping the color pattern of the overlapping squares. (It doesn't matter the shapes of the rectangles in the squares, only the colors matter)

The winner is the player who places all the cards in his hand on the painting.

The Mondrian Experience is a simultaneous visual agility game , where the players experience the building of a Mondrian style painting.

Usually the games to find patterns have one symbol , color or number (like the Domino) to connect with other element on the table, in this game the connections are done with a combination of two from the four colors (Red, Yellow, Blue and Black) that Mondrian used in his paintings. This will cause a change of the mindset in the players, at the beginning it seems like imposible to place the cards , and then it becomes magically easier and easier, it feels like a connection with the way Mondrian did his paintings.

And also ,when the players finish the game , they have created a new art painting!
